PETER HUANG

Irvine, CA | (949) 933-0073 | ph2344@nyu.edu | Portfolio: peterhua.fyi

EDUCATION

New York University, *Steinhardt School of Culture, Education, and Human Development* Expected May 2026
B.S. Applied Psychology | Minors: Integrated Design & Media (HCI/UX), Philosophy
GPA: 3.57 Overall / 3.73 Major | Dean's List, Spring 2024
Relevant Coursework: Human-Centered Research Methods I & II, Statistics for Behavioral Sciences, Agile Product Design, Ideation & Prototyping, Dark Patterns, Seminar I & II.

EXPERIENCE

UX Intern | *Designity, NYC* Aug 2026 – Sep 2026

- Conduct user research and usability testing, applying qualitative and quantitative methods to evaluate product usability and inform human-centered design decisions
- Translate research insights into actionable design recommendations, balancing user needs with business and stakeholder constraints
- Facilitate structured feedback loops with cross-functional stakeholders to uphold usability standards and design consistency
- Maintain research documentation systems to ensure scalability and coherence across usability research touchpoints

Research & Operations Assistant | *DOROT, NYC* Aug 2025 – Dec 2025

- Executed quantitative behavioral data analysis (SPSS) across 400+ program participants to identify usability and accessibility barriers for older adult users
- Translated behavioral research findings into actionable recommendations and stakeholder reports, improving program usability and long-term efficiency
- Applied user-centered communication methods across diverse populations to ensure high-quality, reliable data collection for impact assessments

Clinical Observational Researcher | *Nordoff-Robbins Center for Music Therapy, NYC* Jan – May 2025

- Conducted structured qualitative observational research in a clinical mental-health setting, collaborating cross-functionally with licensed therapists on post-session analysis
- Coded and managed a behavioral database of ~130 therapy sessions using structured tracking protocols to map client progress and therapeutic user journeys
- Synthesized complex behavioral data into a detailed longitudinal case study, applying human-centered, empathy-driven research methods directly transferable to usability and human factors research.

Operations Intern | *NOVA Kitchen and Bar, Orange, CA* Jul 2024 – Aug 2024

- Identified and resolved operational pain points for 100+ daily guests in a high-volume, fast-paced environment
- Collaborated with a 30+ member team to develop efficient operational workflows and communicate project progress under time pressure

SKILLS & COMPETENCIES

Research Methods: Usability Testing, Human-Centered Design, User-Centered Design, Task Analysis, Qualitative & Quantitative Research, Behavioral Data Analysis, Research Protocol Design
Tools: Figma (UI/UX Design, Prototyping, Design Systems), SPSS, Salesforce, Microsoft Suite
Core Competencies: Iterative Problem-Solving, Cross-Functional Collaboration, Storytelling with Data, Empathy, Detail Orientation, Adaptability
